TOXICOLOGY

VOLUME CONTENTS

Volume 67 (1991)

Acute effects of diisopropyl fluorophosphate (DFP) on autonomic and behavioral thermoregulatory respon
in the Long-Evans rat **(Acute DFP administration may lower the set-point for the control of body temperature in r**
by C.J. Gordon, L. Fogelson, L. Lee and J. Highfill (Research Triangle Park, NC).....
In vivo nephrotoxic action of an isomeric mixture of *S*-(1-phenyl-2-hydroxyethyl)glutathione and
(2-phenyl-2-hydroxyethyl)glutathione in Fischer-344 rats **(Nephrotoxicity involves mainly the tubular regi**
by S. Chakrabarti and M.A. Malick (Montréal, Canada).....
Examination of the role of catecholamines in hepatic glutathione suppression by cold-restraint in mice **(Str**
may release endogenous agents that cause a depression in hepatic glutathione content)
by H.F. Simmons, R.C. James, R.D. Harbison, D.G. Patel and S.M. Roberts (Little Rock, AR; Gainesvi
FL and Cincinnati, OH).....
Protection against *cis*-diamminedichloroplatinum-induced nephrotoxicity in rats by *N*-benzyl-D-glucam
dithiocarbamate **(Protective action is documented)**
by M. Kiyozumi, T. Inoue, S. Kojima, S. Hidaka and M. Tsuruoka (Kumamoto and Miyazaki, Japa
Orellanine inhibits protein synthesis in Madin-Darby canine kidney cells, in rat liver mitochondria, and in vit
indication for its activation prior to in vitro inhibition **(The nephrotoxic mycotoxin inhibits protein synth**
after metabolic activation)
by J.-M. Richard, E.E. Creppy, J.-L. Benoit-Guyod and G. Dirheimer (Meylan, Bordeaux and Strasbou
France).....
Placental toxicity of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) in mice **(Placental toxicity of MP**
is possibly due to its prior conversion to MPP^+ in the brain)
by W. Schmahl and B. Usler (Neuherberg, Germany and Basel, Switzerland).....
Porphyrin synthesis by human hepatocytes and HepG2 cells — effects of enzyme inducers and delta-aminolevuli
acid **(Cultured cells produce protoporphyrin not uroporphyrin and thus are atypical models for hexachlorobenze**
induced porphyria)
by O. Visser, J.W.O. van den Berg, H. Koole-Lesuis, G. Voortman and J.H.P. Wilson (Rotterdam, T
Netherlands).....
Acute and subacute inhalation toxicity studies of a new broad spectrum insect repellent, *N*,*N*-diethylphenylacetam
(The inhalation LC_{50} has been determined in rats)
by R. Vijayaraghavan, S.S. Rao, M.V.S. Suryanarayana and R.V. Swamy (Gwalior, India).....
Prevention of nickel subsulfide carcinogenesis by local administration of *Mycobacterium bovis* antigen in m
F344/NCr rats **(Local nickel carcinogenesis may be almost prevented by stimulation of phagocytes)**
by K.S. Kasprzak and J.M. Ward (Frederick, MD).....
Effects of hexachlorobenzene and its metabolites pentachlorophenol and tetrachlorohydroquinone on serum thyr
hormone levels in rats **(Thyroid hormone levels are lowered by oxidative metabolites of hexachlorobenzen**
by J.A.G.M. van Raaij, K.J. van den Berg, R. Engel, P.C. Bragt and W.R.F. Notten (Rotterdam, T
Netherlands).....
Effects of methyl mercury exposure on spleen and blood natural killer (NK) cell activity in the mouse **(Met**
mercury in a dose of 4 mg per gram diet reduces natural killer cell activity)
by N.-G. Ilbäck (Uppsala, Sweden).....
Book Reviews.....
Erratum .....

Dopamine metabolism alterations in a manganese-treated pheochromocytoma cell line (PC12) **(In cell culture manganese interferes with the release of catecholamines)**
by A. Vescovi, L. Facheris, A. Zaffaroni, G. Malanca and E.A. Parati (Milan, Italy) ..... 129—142

Relationship between covalent binding to microsomal protein and the destruction of adrenal cytochrome *P*-450 by spironolactone **(7-alpha-thiospironolactone is possibly a suicide inhibitor of adrenal cytochrome *P*-450)**
by H.D. Colby, J.P. O'Donnell, N.L. Flowers, D.C. Kossor, P.B. Johnson and M. Levitt (Philadelphia, PA) .... 143—154

Effectiveness of *N*-acetylcysteine in protecting against mercuric chloride-induced nephrotoxicity **(Augmentation of the non-protein sulfhydryl pool protects against mercury-induced kidney damage and depletion potentiates nephrotoxic response)**
by G. Girardi and M.M. Elias (Rosario, Argentina) ..... 155—164

α-Tocopherol succinate does not mitigate nitrofurantoin-induced changes in the glutathione and protein thiol status of the isolated perfused rat liver **(Uptake of alpha-tocopherol into the intact organ may be less than in isolated hepatocytes)**
by B. Hoener and A.C. Hjalmarson (San Francisco, CA) ..... 165—170

Ninety-day toxicity study of sodium monochloroacetate in Sprague—Dawley rats **(Target organs at high doses are liver and kidney and a lowest observed adverse effect level of 15 mg/kg per day is suggested)**
by F.B. Daniel, M. Robinson, J.A. Stober, N.P. Page and G.R. Olson (Cincinnati and West Chester, OH and Gaithersburg, MD) ..... 171—185

Effect of endosulfan on thyroid physiology in the freshwater catfish, *Clarias batrachus* **(Endosulfan exposure stimulates T_4 biosynthesis in the pharyngeal thyroid)**
by N. Sinha, B. Lal and T.P. Singh (Varanasi, India) ..... 187—197

Induction of heme oxygenase in the small intestinal epithelium: a response to oral cadmium exposure **(Continuous low-dose oral exposure to Cd may compromise the ability of the small intestine to metabolize and detoxify ingested xenobiotics)** by D.W. Rosenberg and A. Kappas (New York, NY) ..... 199—210

Experimental studies on tumor promotion by nitrogen dioxide **(The air pollutant may modulate the development of chemically induced lung tumors in rats)**
by T. Ichinose, K. Fujii and M. Sagai (Ibaraki, Japan) ..... 211—225

Arsenic-cadmium interaction in rats: toxic effects in the heart and tissue metal shifts **(Possible factors in interactions may include different affinities for metals of proteins, induction of different molecules or redistribution of metal ions)**
by L. Yañez, L. Carrizales, M.T. Zanatta, J. de Jesús Mejía, L. Batres and F. Díaz-Barriga (San Luis Potosí, Mexico) ..... 227—234

Book Review 235

Selective release of glutathione transferase subunits from primary cultured rat hepatocytes by carbon tetrachloride and deoxycholic acid **(Hepatotoxicity resulted in the loss of cellular GSH transferase activity with concomitant loss of the enzyme from the cells)**
by E. Lee, Y. Miki, Y.-I. Furukawa, H. Simizu and K. Kariya (Kobe, Japan)..... 237—248

Testicular toxicity of rats exposed to hexafluoroacetone (HFA) for 90 days **(Description of the sequential morpholological damage and recovery in the germinal epithelium)**
by K.P. Lee and G.L. Kennedy, Jr. (Newark, DE)..... 249—265

Efficacy of an oximate-based skin decontaminant against organophosphate nerve agents determined in vivo and in vitro **(Protective effects are documented)**
by T.W. Sawyer, D. Parker, N. Thomas, M.T. Weiss and R.W. Bide (Alberta, Canada)..... 267—277

Studies on the mechanism of haloacetonitriles toxicity: quantitative whole body autoradiographic distribution of [2-^{14}C]chloroacetonitrile in rats **(Potential target sites, as witnessed by accumulation of radioactivity, are the thyroid gland, GI tract, testes, eyes, brain and kidneys)**
by A.E. Ahmed, S. Jacob and J.-P. Loh (Galveston, TX)..... 279—302

Studies on lipid peroxidation in rat tissues following administration of low and moderate doses of cadmium chloride **(Lung and brain are most responsive and glutathione peroxidase may be a potential modulator of lipid peroxidation in heart and lung)**
by D. Manca, A.C. Ricard, B. Trottier and G. Chevalier (Montreal, Canada)..... 303—323

Decreases in spontaneous tumors in rats and mice after treatment with amphetamine **(Reduction in body weight went along with reduction in a wide variety of spontaneous tumors)**
by J.K. Dunnick and S.L. Eustis (Research Triangle Park, NC)..... 325—332

Subacute exposure to low concentrations of toluene affects dopamine-mediated locomotor activity in the rat **(Low level toluene exposure modifies the locomotor effects of apomorphine)**
by G. von Euler, S.-O. Ögren, S.C. Bondy, M. McKee, M. Warner, J.-Å. Gustafsson, P. Eneroth and K. Fuxe (Stockholm and Huddinge, Sweden and Irvine, CA) ..... 333—349
Book Review ..... 351—352
Announcements ..... 353—354
Contents of journals relating to Toxicology ..... 355—359
Subject Index Volume 67 ..... 361—364
Author Index Volume 67 ..... 365—366
Contents Volume 67 ..... 367—369
